Ok. Let me know if you anything.

By the way. I'm meeting with the geophysics contractor next Wednesday to hammer out the details of the cost estimate and the discrepancy with yours. That's the one where we have a big difference.

As far as the CPT/LIF and GeoProbe estimates, mine were higher than yours because of:

- the 10% markup we have to pay our contractor
- paying for the field oversight person our contractor has to provide when using subs (I use \$1000/day)
- Rounding up, which I do to cover expendables and extra hours if needed

The CPT/XRF with markup and oversight generally comes out to \$7500/day, but I used \$10k per day for my estimate. With the GeoProbe, I used \$3000 per day to include markup, oversight, and expendables. In actuality, the job will be bid out and prices will likely be closer to yours. I round up high to cover things I may not have thought of.

Hi Katrina –

Sella Burchette from our team was going to send you an explanation for initiating the funding process. Did you get it? If so, is it self-explanatory or do you need more information?

Tom
